

CITADEL WORLDWIDE MULTI-STRATEGY H4 RETAIL HEDGE FUND

INVESTMENT OBJECTIVE AND POLICY

The Citadel Worldwide Multi-Strategy H4 Retail Hedge Fund is a multi-strategy, multi-asset class, hedge fund which has the objective of generating consistent, uncorrelated returns.

The fund invests in different asset classes and apply different strategies in order to maximise decorrelation. The portfolio may invest worldwide and shall have the maximum flexibility to vary allocations between local and international markets and between sectors, to reflect the changing economic and market conditions.

The commitment approach will be used to ensure that leverage is contained within 200% of the total net asset value of the fund relative to the market.

RISK REWARD PROFILE

The fund has a moderate risk profile and is best suited to investors with a long-term investment horizon. The risk profile is assessed on a regular basis to ensure that the risk profile is supported by the risk metrics of the portfolio.

RISK STATISTICS³

	FUND	BENCHMARK
Standard Deviation	3.6%	0.2%
Sharpe Ratio	0.1	0.0
Maximum Drawdown	-3.3%	N/A
Positive Months	80.0%	100.00%

³Risk Statistics are calculated from 1 July 2023

Standard Deviation: statistical measurement of the dispersion of fund returns relative to its own average return over the measured period

Sharpe Ratio: a measure of how much risk a fund had to bear to earn excess return over the risk-free rate (STeFI 3-month). The higher the Sharpe Ratio, the better the fund's historical risk adjusted return

Maximum Drawdown: the fund's maximum, peak to trough, decline during the measured period, as a percentage

Positive Months: the number of months the fund delivered a positive return during the measured period, as a percentage

INVESTMENT CHARGES

Three year annualised as per ASISA Standard
1 April 2023 to 31 March 2026

TOTAL EXPENSE RATIO (TER)⁴ 2.68%
of the value of the fund was incurred as expenses relating to the administration of the fund. No performance fees are charged

TRANSACTION COSTS (TC) 0.26%
of the value of the fund was incurred as costs relating to the buying and selling of the assets underlying the fund

TOTAL INVESTMENT CHARGE (TER + TIC) 2.94%
of the value of the fund was incurred as costs relating to the investments of the fund

One year TER as at financial year-end, as per Board Notice 92 of 2014
1 April 2025 to 31 March 2026

TER⁴ 3.62%
of the value of the fund was incurred as expenses relating to the administration of the fund

⁴ A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return

FUND COMMENTARY

May saw global equity markets extend their April gains, even as geopolitical tensions continued to weigh on the macroeconomic backdrop. Persistently elevated oil prices kept energy-driven inflation concerns in focus, complicating the path for global central banks. Credible attempts at a US-Iran agreement raised the prospects of a resolution, though negotiations remained ongoing. Despite these headwinds, global equities maintained a risk-on phase, led by continued rotation into artificial intelligence (AI) related stocks. The MSCI World Index (in US dollars) returned 4.6% for the month. The S&P500 Index gained 5.2% and the Nasdaq Composite advanced 8.4%, with both indices reaching all-time highs supported by a strong earnings season. European equities also advanced, with the MSCI Europe Index (in US dollars) rising 2.6%. The MSCI Emerging Markets Index (in US dollars) gained 9.7%, driven by continued strength in technology and semiconductor stocks. Global bond markets experienced elevated volatility, reflecting uncertainty over the growth and inflation implications of the Middle East conflict. The Bloomberg US Treasury Index edged up 0.1%, as yields remained elevated on the back of inflation risk. South African financial markets delivered a mixed performance. The FTSE/JSE All Share Index declined 0.3%, as gains in financial (+0.9%) and consumer discretionary shares (+1.2%) were offset by weakness in technology (-5.0%) and basic materials (-1.0%). The FTSE/JSE All Bond Index returned 2.9%, supported by Moody's revising South Africa's outlook to positive, providing a constructive backdrop for domestic fixed income. The South African Reserve Bank raised the repo rate by 25 basis points to 7.0%, with the Monetary Policy Committee citing rising upside risks to inflation, including the oil price shock and an uncertain global environment. The rand strengthened 3.0% against the US dollar, reflecting improved global risk sentiment.

Against this backdrop, the Citadel Worldwide Multi-Strategy H4 Retail Hedge Fund was up 1.3% for the month, bringing the 1-year return to 7.3%. The fund remains well diversified across three distinctly different strategies, both locally and globally. The fund continues to adhere to its policy.

INFORMATION AND DISCLOSURES

About the manager, trustee/custodian, scheme and administrator

This portfolio was established by H4 Collective Investments (RF) (Pty) Ltd, registration number 2002/009140/07 ("the manager"), of The Citadel, 15 Cavendish Street, Claremont, 7708 (telephone +27 21 670 9100) as part of the H4 Collective Investments Scheme ("the scheme"). The trustee of the scheme is the Standard Bank of South Africa Limited, registration number 1962/000738/06, of 9th Floor, Standard Bank Centre, 5 Simmonds Street, Johannesburg, 2001 (telephone +27 11 636 9111/2). The administrator of the scheme is Apex Fund Services South Africa Limited, registration number 1981/009543/07, of Apex House 1, River Park, Gloucester Road, Mowbray, 7700 (+27 21 681 8000).

About the investment manager

The manager has appointed Citadel Investment Services Proprietary Limited, registration number 1996/006847/07 ("Citadel"), as the investment manager of the portfolio. Citadel is licensed as a hedge fund financial services provider in terms of the Financial Advisory and Intermediary Services Act, 2002.

Legal structure of the portfolio

The portfolio is established as a trust by way of a supplemental deed to the main deed of the scheme, executed by the manager and the trustee/custodian and approved by the Financial Sector Conduct Authority in terms of the Collective Investment Schemes Control Act, 2002. The assets of the portfolio may be held by the trustee/custodian or by another bank or by the nominee of the portfolio's prime broker.

Risk warning

The risk and return profile of a fund illustrates the amount of risk undertaken by an investor in the hope of achieving a particular return on an investment. The generally accepted principle is that potential return rises with an increase in risk. The risk and return profile on the face of this document is based on the historical performance of the fund. In addition to the risk warnings included elsewhere in this document, it is important to note that there are many other risks associated with investing in collective investments. These can include but are not limited to the following: general market risks (such as general movements in interest rates; external factors [war, natural disasters and such like]; changes to the law and regulatory frameworks; governmental policy changes; global, regional or national economic developments), risks related to a specific security (like the possibility of a company's credit rating being downgraded); and loss in the purchasing power of an investment as a result of an increase in the price of consumer goods (known as inflationary risks).

The portfolio may invest in foreign securities. There are potential material risks associated with investing in foreign securities. These include but are not limited to: potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political and social instability, foreign exchange risks, tax risks, settlement risks and potential limitations on the availability of market information, all of which may have an impact on fund performance. In addition, risks associated with investing in emerging markets (which are generally less mature than those in developed markets) include but are not limited to currency risks, the possibility of expropriation, confiscatory taxation or nationalisation of assets and the establishment of foreign exchange controls which may include the suspension of the ability to transfer currency from a given country.

Hedge funds use complex hedging strategies that include the use of leverage to increase the exposure of the portfolio beyond the capital that is employed to an investment. Leveraging includes the use of derivatives. Derivatives derive their value from the value of an underlying asset. The use of leveraging within a portfolio involves risk because depending on how the leveraging is structured, the portfolio's losses or gains may be unlimited. Other risks include counterparty risk and liquidity risk. Counterparty risk is the risk that the other party to a transaction may not be able to perform their obligations. Liquidity risk means that during volatile periods, the tradability of certain instruments may be impeded. A retail hedge fund portfolio's gross exposure to the market may be up to a maximum of 200% of the total net asset value of the portfolio.

General disclosures

This document is the minimum disclosure document required by Board Notice 92 of 2014 published under the Collective Investment Schemes Control Act 45 of 2002. This portfolio was established for a specific group of investors and may not be available for direct investment by the general public. Collective investment schemes are generally medium to long-term investments. The value of participatory interests or the investment may go down as well as up. Past performance is not necessarily a guide to future performance. Collective Investment schemes are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees and charges and maximum commission is available on request from the manager. No performance fees are currently levied in any of the portfolios by the manager. Neither the manager nor Citadel provides any guarantee either with respect to the capital or the return of the portfolio. The manager has the right to close the portfolio to all new investments or to new investors in order to manage it more efficiently in accordance with its mandate. Where any forecasts or commentary about the expected future performance of asset classes or the market in general are made in this document, please note that neither Citadel nor H4 guarantee that such forecasts or commentary will occur.

Performance disclosures

The performance calculated and shown is that of the portfolio. Individual investor performances may differ as a result of initial fees (if applicable), the actual investment date, the date of reinvestment and dividend withholding tax. Where periods of longer than one year are used in calculating past performance, certain figures may be annualised. Annualisation is the conversion of a rate of any length of time into a rate that is reflected on an annual basis. All since-inception performance returns are calculated from the launch date of the portfolio. Due to a change in the fund's investment policy in June 2023, all since-inception returns and fund performance is measured from 1 July 2023.

Disclosures in respect of third-party-named portfolios

This portfolio is a third-party-named portfolio. A third-party-named portfolio bears the name of both the manager and the investment manager. The manager retains full legal responsibility for the third-party-named portfolio.

CITADEL WORLDWIDE MULTI-STRATEGY H4 RETAIL HEDGE FUND

Calculation of the NAV and price

The value of participatory interests is calculated on a NAV basis. The NAV is the total value of all assets in the portfolio including any income accruals and less any deductible expenses (which may include audit fees, brokerage, service fees, securities transfer tax and bank charges). The price of participatory interests is calculated by dividing the NAV by the number of participatory interests in issue. The portfolio is available via certain LISPs, who levy their own fees. Investors in this portfolio may thus be liable for an initial fee and/or annual service fee levied by the third party administrator that is not reflected in the initial charge (where applicable) or NAV calculation. Prices are published monthly on the MDD.

Limitation of liability

This document has been compiled for information purposes only and does not take into account the needs or circumstances of any person or constitute advice of any kind. It is not an offer to sell or an invitation to invest. The information and opinions in this document have been recorded by Citadel and the manager in good faith from sources believed to be reliable, but no representation or warranty, express or implied, is made as to their accuracy, completeness or correctness. Citadel and the manager accordingly accept no liability whatsoever for any direct, indirect or consequential loss arising from the use of this document or its contents.

Complaints process

Any complaint must be set out in writing and include all relevant information and documents in the complainant's possession. The complaint must be addressed to the manager's compliance officer and posted or hand-delivered to the manager's physical address above or sent by email to info@H4CI.co.za. The complaint will be investigated internally and the complainant will be advised of the outcome of the complaint.

Additional information
